

# HyTech Booths

Fiberglass offers greater durability than metal, wood, or concrete in a lightweight structure. It is attractive, non-corrosive, non-reactive, non-conductive, RF-transparent and low maintenance. It is resistant to UV rays, extreme cold or heat, exhaust and soot, road and ocean salt, acid rain and chemicals.

HyTech is the premium line of fiberglass shelters offered by VPC Fiberglass and are designed to provide comfort and shelter for people such as security guards, parking lot attendants, and toll collectors in a wide variety of settings like airports, theme parks, college campuses and hospitals. These shelters are available in a virtually limitless array of sizes and colors, providing an attractive appearance, low maintenance, and long term durability. These fiberglass shelters are non-corrosive, non-conductive, and RF transparent. They are shipped fully assembled for ease of installation.

## FEATURES:

- Carpeted Interior Walls
- Operatable Window
- 360 Visibility
- Electrical Package
