

SHELTERS

Offering a complete line of standard and custom fabricated shelters, our tough and durable line of Enduro shelters range from 29" x 29" to 72" x 72". These shelters provide protection for water samplers, generators, pumps, well heads, chlorination equipment or whatever equipment/instrumentation requires protection from a challenging environment.

Also available is an on-staff design team to customize a fiberglass enclosure that best meets your needs when our standard line may not be the best fit for your application.

MODEL 50

29" X 29" X 35"

MODEL 300
